## 3rd Infrastructure Today International Conference

The hangover of an impending recession is over. Growth is back. A growth in GDP is likely to reduce the fiscal deficit. The country's per capita income will see a surge of 9 per cent during the current financial year. The Central Statistical Organisation (CSO) estimates a growth of 7.2% for 2009-10 on the back of a robust "mining & quarrying" growth of 8.7% against 1.6% in the previous year, "construction" growth of 6.5% against 5.9%, "electricity, gas & water supply" growth of 8.2% against 3.9%, "manufacturing" growth of 8.9% against 3.2% and "Transport & Communications" of 8.3% against 7.6%. India needs to step up its investment in infrastructure to keep up its growth galloping to reach a target of over 10%.

The 3rd Infrastructure Today International Conference will facilitate and encourage dialogue to enable thought & consequent action to move into an orbit of fresh concepts and solutions. Founded in the year 2008, Infrastructure Today International Conference in its 3rd year is an initiative to create a platform for Industry leaders, academicians, researchers and decision makers from government representing the different countries in this region and Industry players to come and interact, share their experiences and provide expertise to overcome the regional and operational challenges faced by the Infrastructure sector.
